Marking the Boundaries of the Nations since 1972

MONUMENT INSTALLATION INSTRUCTIONS

MODEL RT1 MARKER

MATERIALS REQUIRED FOR SETTING MONUMENT:

6. RT-1 Marker
7. Chisel or Drill (such as Ryobi™ or Pionjar™ gasoline-powered Hammer/Drills)
8. Grouting Concrete (such as Drylok™ Anchoring Cement)
9. Steel stamp set
10. Work gloves and proper eye protection and clothing

IMPORTANT: Prior to installation, stamp as much information on the marker as possible.

INSTALLATION

EXISTING CONCRETE/ROCK:

1. Chisel or drill a 1 1/4 inch (32mm) diameter hole (3 1/2 inches [90 mm] deep).
2. Clean out hole and surrounding surface area.
3. Insert RT-1 marker into hole.
4. Using chalk, a felt-tip marker, or other writing instrument, mark around outside edge of the RT-1 marker. Remove RT-1 marker from hole.
5. Using a chisel, enlarge hole to marked outline. Reinsert marker into hole to verify proper "fit". Continue enlarging area as required to provide for a flush-mounted installation.
6. Clean area. Put a small amount of grouting material into hole (we recommend DRYLOK™ brand anchoring cement which is non-shrinking and sets in 5 minutes). Insert RT-1 marker into hole and determine how much additional grouting material must be used. Repeat process until all voids are filled.
7. Clean and "finish" area.

POURED-IN-PLACE MONUMENTS

1. After monument has been poured in place, allow to set for 5-10 minutes and then insert RT-1 marker into proper position.
2. Clean area around top surface of marker.
3. CAUTION: Do not attempt to mark additional information on marker until monument is completely set.

*****HINT: WHENEVER POSSIBLE, ALWAYS MAKE YOUR CHISEL/DRILL HOLE AS CLOSE IN SIZE TO MARKER BEING USED (RT-1) FOR BEST ADHESION OF GROUTING MATERIAL.**

REMEMBER: "Any Monument Is Only As Good As How It Was Set".
